

Timișoara City Hall organizes the final event of a European project dedicated to transdisciplinary education

Timișoara City Hall invites you on Friday, May 19, at 10:00, to the final conference for disseminating the results of the project "**EXPLORE + creative explorations of curiosity for transdisciplinary innovation, STEAM and social learning**". The conference will take place in the FITT building (Youth House), str. Arieș nr. 19, halls 03 - 04, on the ground floor.

The launch of the project took place in October 2021, in Chemnitz, Germany, with the participation of partners from Portugal, Latvia and Romania. The project included joint training and mobility events, which aimed to develop local and regional policies in the field of education, but also to increase the level of involvement of young people in movements promoting European youth objectives. Activities included study visits, the development of STEAM educational activities, and science fairs. Collaborations between schools, cultural agents and civil society have contributed to the development of a toolkit as an open source of learning following the STEAM model. This educational method uses science, technology, engineering, arts and mathematics as access points for the development of dialogue and critical thinking of students.

The project has achieved several objectives of the European Capital program and common EU-wide objectives of cooperation in education and training (ET 2020). For Timișoara, it represented an opportunity to actively involve the community in capitalizing on the title of European Capital of Culture (CEC), through dialogue and open collaboration.

The financing of the project was made through a grant of 276.410,00 EURO, through the Erasmus+ European Union program. The grant for Timișoara municipality was 18.555 EURO. The implementation period of the project was between June 2021 and May 2023.

The project partners are: Solaris FZU, in cooperation with the city of Chemnitz (Germany) - which will become the European Capital of Culture in 2025, AE Pinheiro e Rosa and Museu Zero, in cooperation with the city of Faro (Portugal), Friendly Appeal Cesis State Grammar School, Cesis Municipality (Latvia) and Timișoara (Romania).
